BIG TIPPER

Big Tipper

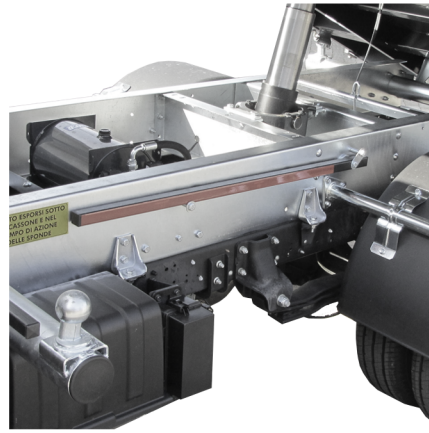

This innovative product consist in the manufacture of a mock chassis entirely bolted and galvanized, built with latest generation technologies.

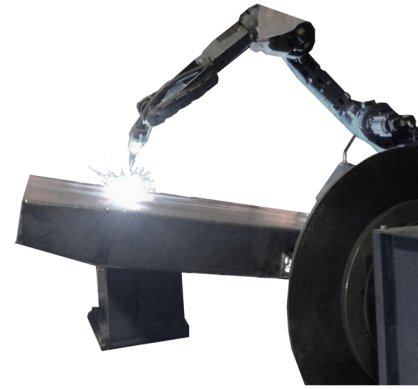

MOCK GALVANIZED CHASSIS

We manufactured a mock chassis entirely **bolted and galvanized**. The **electrolytic galvanizing** process improves durability in time with an excellent anti-corrosion effect.

MOCK BOLTED CHASSIS

This new bolted chassis is **removable and interchangeable** so, in the event of an accident, **it is easy to repair separately** and within short times.

ROBOTIZED TECHNOLOGY

The new tipping body is welded and bent through totally **latest generation technologies**.

PAINTING

The body is painted with sandblasting sa 2.5, water-based epoxy primer (12- 15 micron) and **polyester powder** application (70- 90 micron).

THREE- SIDED TIPPING BODY

New

- **Mock chassis entirely bolted and galvanized**
- Iron bottom 3 mm
- Sides in highly resistant aluminium alloy h 400 mm

New

- **Painting of the body with dark grey polyester powder ral 7021**
- Labels compliant with safety standards
- EC standards compliant

The logo features the word "Saracco" in a large, elegant, blue cursive script. Below it, the year "1906" is written in a bold, blue, sans-serif font. The entire text is enclosed within a blue, horizontal, oval-shaped swoosh that tapers at both ends. A vertical blue line runs down the right side of the page, starting from the top of the swoosh and extending past the bottom of the page.
